

vim-flog

Matthias Günther

Features

- find and checkout Branches (with autocompletion)
- explore history

Custom mappings

- normally ZZ to close windows
- I prefer pressing q:

```
augroup flog
  au FileType git map <buffer><silent>q :bw<cr>
  au FileType floggraph map <buffer><silent>q :bw<cr>
augroup END
```

Configs

- change display format of git messages:

```
let g:flog_default_date_format = 'format:%Y-%m-%d %H:%M:%S'
```

Get all commits concerning a file

```
:Flog -path=archive.md
```

Comparison to gitv

- only necessary features
- loads fast
- has API to be able to easy add new features
